Election/Restrictions

1. In view of the amendment and the newly added claims, the Examiner has discovered that a restriction requirement between the claims drawn to the starter and those drawn to the timepiece is now necessary. The requirement is as follow.

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 26-45 and 51-53, drawn to Group I, classified in class 310, subclass 40R.

II. Claims 46-50 and 54-56, drawn to Group II, classified in class 368 subclass 203.

The inventions are distinct, each from the other because of the following reasons:

3. Inventions Group I and Group II are related as combination and subcombination.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed such as a wheel train that includes a plurality of gears, for transmitting mechanical energy to and from the rotor. The subcombination has separate utility such as starter for a motor not located in a timepiece.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. A telephone call to the applicant to request an oral election was not made due to the complexity of the restriction requirement.
6. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
8. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jeanne-Marguerite Goodwin whose telephone number is (571) 272-2104. The examiner can normally be reached on alternate Fridays off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Kammie Cuneo can be reached on (571) 272-1957. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
